

# ELECTRONIC INSECT TRAP

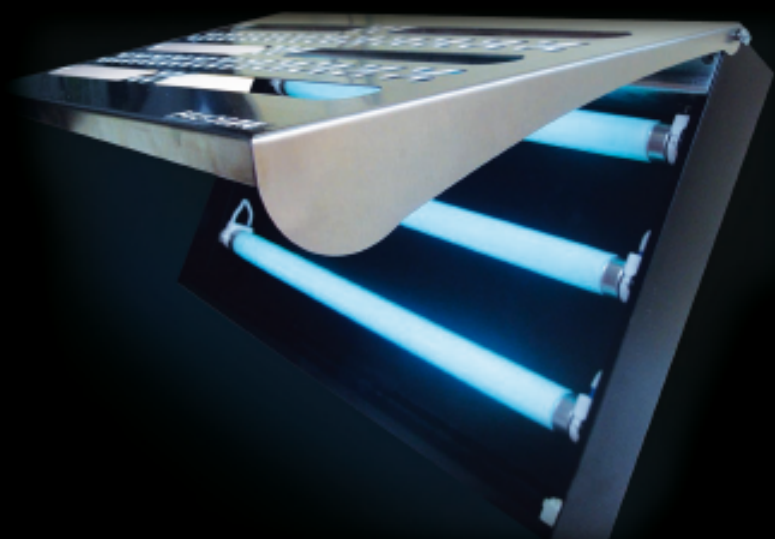

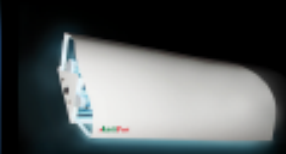

The AntiPest Electronic Insects Trapping Device (EITD) is a quality system, packaged in a unique and decorative design, which controls and regulates the annoying threat of flying insects.

## Discreet

The unique and decorative front cover cleverly conceals the glue board and insect trap; thus, providing a discreet and environmentally friendly control system for flying insects. Ideal for use in restaurants, F&B outlets, hotels, hospitals and all public areas where it is essential that the management of flying insects is hidden from the view of the naked eye. The front cover can be painted, wall-papered or decorated to match existing decor.

Material	Brightness	Type	Dimensions
Mild Steel	2 X 18 watts	Wall mounted or suspended	660mm x 245mm x 110mm

## Hercules

The Hercules unit is defined by its sleek, modern appearance, high quality performance and its versatility in tackling various insect problems. The unit is ideal for use in all Production & Manufacturing plants, food production and preparation areas. Its UV tubes supply a stronger attraction power to flying insects compared to other existing systems in the current market. It has a unique stainless steel cover, which is easy to clean and maintain.

Material	Brightness	Type	Dimensions
Mild Steel	3 X 18 watts	Wall mounted or suspended	500mm x 295mm x 67mm
